

MGWCC Presents... **I Want to Grow A _____ Garden**

Thursday, March 10 ... A Flower Garden by Collette McClinton

Course Summary: The Flower Garden seminar will teach the basic skills of creating and maintaining a flower garden. Topics include: choosing and preparing your site, planting and seeding your flowers, organic control of pests, weeds, and disease, proper irrigation, and – best of all! - how to enjoy what you've grown as cut flowers.

Thursday, March 17 ... A Vegetable Gardens by Kate Long

Course Summary: The Vegetable Garden seminar will teach the basic skills of creating and maintaining a vegetable garden. Topics include: choosing and preparing your site, planting and seeding your veggies, organic control of pests, weeds, and disease, proper irrigation, and – best of all! - how to harvest what you've grown.

Thursday, March 24 ... A Native Plant Garden by Drew Lathin

Course Summary: Gardening with native plants is increasing rapidly in popularity because they better support habitat and do not require resource inputs such as fertilizers, chemicals, and supplemental water. And, they are beautiful. Learn some of the unique techniques usually associated with gardening with native plants.

Thursday, March 31 ... A Butterfly Garden by Brenda Dzedzic

Course Summary: Learn the necessary components of a Butterfly Garden. Want Monarchs, Giant Swallowtails, or Red Admirals butterflies in your landscape? Choose the butterflies you would like to see and plant for them. Learn about the right plants, care, and beneficial insects to ensure that you will have them.

Cost: \$15/course, \$50 for all 4 courses

Time: 7:00 pm

Location: Wayne County Community College, West Campus
9555 Haggerty Rd.
Belleville, MI
